

## Lunchtime Seminar: Clinical care delivery & implementation science

Time:	11.00am to 12pm
Date:	19 September
Location:	RNC Lecture Theatre
Teams Meeting Details:	<a href="#">Click here to join the meeting online</a>

**HNE's Nursing & Midwifery Research Centre** in collaboration with **HMRI's Healthcare Transformation Research Program**, is delighted to invite you to a lunchtime seminar presented by **Associate Professor Miriam Bender**, from the University of California Irvine's Sue & Bill Gross School of Nursing.

In this presentation, Associate Professor Bender will introduce some basic implementation science concepts and frameworks and provide a broad overview of their potential use in clinical care research, including the selection of appropriate concepts/frameworks and the use of participatory approaches and adaptation tools when implementation evidence into clinical care practices.

*A light lunch will be provided at RNC following this presentation.*

To register for this event:

Please RSVP by emailing [HNELHD-NMRC@health.nsw.gov.au](mailto:HNELHD-NMRC@health.nsw.gov.au) advising if attending virtually or in person by Monday 11 September.

**Miriam Bender**, PhD RN; Co Editor-in-Chief, Nursing Philosophy, is Associate Professor at the University of California Irvine's Sue & Bill Gross School of Nursing. Empirically, Associate Professor Bender's research focuses on the relationality between the organization of healthcare delivery, multi-professional practice dynamics, and patient care quality and safety outcomes. This program of research intersects with implementation science as it explores the connectivity of healthcare interventions, contexts (people, things, and practices that characterize where an intervention is introduced), and implementation (the ways an intervention is operationalized into practice) and how that connectivity influences healthcare outcomes.
